Mississippi Report Card for 2001-2002

Statistical Report on Mississippi's Public School Districts
Mississippi Department of Education

Welcome to the *Mississippi Report Card for 2001-2002*. This year we continue our effort to present useful and important information about the districts and schools in the state, and we have updated the Report Card content to address more stringent federal requirements of the No Child Left Behind Act of 2001 (NCLB), signed into law in January 2002. This printed publication includes the same district-level information that has been included in previously published report cards. The CD provided inside the front cover of this book contains the Report Card in its entirety as required by federal law, as well as school-level test data and additional categories of information as required by NCLB. The entire publication is also available on the internet at <http://www.mde.k12.ms.us/account/RC2B/RC2B.htm>.

The State Board of Education and the Mississippi Department of Education support the goals of the No Child Left Behind Act of 2001: to ensure every child reaches a proficient level of educational performance with the help of highly qualified teachers. To that end we continue to make improvements to public education and accountability in our school districts. This Report Card is useful for evaluating the status of these endeavors. Both demographic and performance data are presented for the one hundred and fifty-two Mississippi school districts.

I hope you find this Report Card informative and reflective of our commitment to improving public education in Mississippi.

Mississippi Report Card for 2001-2002

The *Mississippi Report Card* is provided as an evaluation tool for Mississippi's 149 school districts and three agricultural high schools. Information included in the Report Card represents data collected for school year 2001-2002. The reporting process is in accordance with MS Code Annotated §37-3-53 and federal Title I requirements.

Attached inside the front cover of this book is the CD, *Mississippi Report Card for 2001-2002*, which contains the complete publication, including a directory for district demographic information and test data by state, by district, and by school. The complete *Mississippi Report Card for 2001-2002* is also accessible on the web at <http://www.mde.k12.ms.us/account/RC2B/RC2B.htm>.

This printed book of the same name is abridged and includes only state- and district-level data. The school-level data file is voluminous and cannot be accommodated in printed format. To use the *Mississippi Report Card for 2001-2002* CD, follow the directions provided inside the front cover of this book. Adobe Reader is required for use of some of the Report Card files; it can be installed from the Report Card CD (Windows only) or from the Adobe web site.

Reporting Process

Many categories of data are ranked. The ranking may indicate (1) size or amount, such as enrollment, or (2) performance level, such as test scores. N/A indicates the item is not ranked. The ranking will be from one to 152, with one representing either the largest in relation to size/amount or the highest ranking in relation to performance. If several districts have the same data, those districts will receive the same ranking and the next district in order will receive a ranking corresponding to the number of districts ahead of it. If several districts tie for last place, the last ranking will not be 152.

School District Name and Number

There are 152 school districts (including three agricultural high schools) in Mississippi. Each district has a four-digit code assignment that corresponds to the county in which it is located. Districts are presented in this report in district code order, which is alphabetical by the counties in the state. An alphabetical listing of school districts regardless of county code is located behind the "Table of Contents" in the front of this book. On the CD, district listings appear alphabetically.

Demographic Information

Accreditation Status

In October, each school district is assigned an accreditation status of accredited, advised or withdrawn. An assigned accreditation status may remain unchanged during the school year except in those cases where verified noncompliance with financial standards, the testing standard, or continued noncompliance with federal regulations may downgrade a status immediately or where correction of deficiencies in meeting process standards upgrades a level.

A district's accreditation status may also be affected if one of its schools continues to be designated as a Priority School after three (3) years of implementing a school improvement plan, or if more than fifty percent (50%) of the schools within the district are designated as Priority Schools in any one (1) year.

2001-2002 Enrollment

The enrollment data provided in this report are taken from the Mississippi Department of Education's *Public School Enrollment 2001-2002 Fall Enrollment* publication. The figures reflect the enrollment as of October 31, 2001.

Student/Teacher Information

Attendance as % of Enrollment

Attendance as a percentage of enrollment is calculated by dividing the second month's average daily attendance by the end of the second month's enrollment.

% Eligible for Free Lunch

The percentage of students eligible for free lunch is based on information reported on the October *School Lunch Monthly Claim for Reimbursement*. The calculation is based on the number of students reported as eligible for free meals (not reduced meals) divided by the total number of students reported as enrolled.

Number of Carnegie Units Taught

The number of Carnegie units taught is taken directly from the Mississippi Student Information System (MSIS). Carnegie units are the actual units taught. If more than one teacher teaches the course, the course will be counted only once. The Carnegie unit is

an unduplicated count of units taught, including Career/Technical (Vocational) Education units. The state Carnegie unit figure represents an average of Carnegie units taught in the state.

Number of Dropouts

2001-2002 dropout data are provided by school districts through the Mississippi Student Information System (MSIS). Data collection occurred over a nine-month period to capture a count of dropouts during the 2001-2002 term. Dropouts returning to school while the term was in session were deleted as dropouts upon re-entry into the system.

% Teachers with Advanced Degrees

The percentage of teachers with advanced degrees is calculated by summing the full-time equivalence (FTE) for all school personnel teaching instructional courses and holding an advanced degree (AAAA, AAA, AA). This value is divided by the total number of personnel teaching instructional courses in the district.

% Emergency Certificates

The percentage of emergency certificates refers to the number of emergency certificates relative to the total number of teachers. These numbers are taken from the Mississippi Student Information System (MSIS) and include school personnel with an instructional code "EC" (emergency certificate) in their type of certificate. This count includes only emergency certificates issued prior to the cut-off date for Minimum Program funds for the school year in question (2001-2002).

% Gifted Students (Grades 2-12)

Gifted data is not available for the 2001-2002 school year. The gifted program, by law, only serves grades 2-12. The percentage of gifted students will be reported in the next publication and is a percentage derived by taking the total number of children in the gifted program and dividing it by the district's end of first month enrollment for grades 2-12.

Special Education

% Special Education Students

The percentage of students in special education includes only ages 5-21. It is determined by dividing the *December 1, 2001, IDEA Part B, Child Count Report* data by the enrollment data for month three of the *Average Daily Attendance Report*. In addition, 2,972 students ages 3-4 received special education services, according to the *December 1, 2001, IDEA Part B, Child Count Report*.

% Receiving Diplomas

The percentage of special education students receiving diplomas is determined by dividing the total number of special education students who received regular diplomas by the total number of special education students who graduated (regular diplomas and certificates) as submitted by each district in the *Report of Children and Youth With Disabilities Exiting the Educational System During the 2001-2002 School Year*.

Federal Special Education Expenditure

This information reflects Special Education FY2002 expenditures of federal funds as submitted on financial reports by each school district to the Mississippi Department of Education.

State/Local Special Education Expenditure

This information reflects Special Education FY2002 expenditures of state and local funds as submitted on financial reports by each school district to the Mississippi Department of Education

Career/Technical Education (Vocational Education)

Number of Career/Technical Teachers

The number of career/technical education teachers is the sum of individual full-time equivalent (FTE) indices of career/technical teachers in the district funded by the Office of Vocational and Technical Education for school year 2001-2002. Teacher FTEs at vocational centers are credited to the center's fiscal agent. The data reported as teacher FTEs do not include administrators, guidance counselors, special populations

personnel, or special projects coordinators. These staff positions are classified as career/technical administration or career/technical support staff.

% Students in Career/Technical Programs (Grades 7-9)

The percentage of students in career/technical programs in grades 7-9 is computed by dividing the number of career/technical students enrolled in grades 7-9 by the fall enrollment in grades 7-9.

% Students in Career/Technical Programs (Grades 10-12)

The percentage of students in career/technical programs in grades 10-12 is computed by dividing the number of career/technical students enrolled in grades 10-12 by the fall enrollment in grades 10-12. Career/technical students who were enrolled in career/technical programs at vocational centers were counted in the “feeder” school district’s enrollment totals.

Finance

Total Per Pupil Expenditure

The total per pupil expenditure is calculated by using the total current expenditures from all sources of revenue divided by the nine months’ *Average Daily Attendance*. Current expenditures reflect all costs of school district operations except improvement to 16th section land, facilities acquisition and construction, and debt service.

Estimated State and Local Per Pupil Expenditure

The estimated state and local per pupil expenditure was derived by applying the percentage of state and local revenues for the district against the total per pupil expenditure for each district.

Estimated Federal Per Pupil Expenditure

The estimated federal per pupil expenditure was derived by applying the percentage of federal revenues for the district against the total per pupil expenditure for each district.

% District Administration Expenditures

District Administration is defined as expenditures for salaries and fringe benefits paid from all sources of revenue in the following functions of expenditures as defined in the *Mississippi Public School District Financial Accounting Manual*: Board of Education Services, Executive Administration Services, Business Services, and Support Services-Central. The percentage district administration expenditure is calculated by dividing the total expenditures in these functions by the total current expenditures as defined above.

Total Operational Levy

This figure represents the local ad valorem tax levy that supports the basic operation of a school district. The state average operational levy for school year 2001-2002 is 39.69.

Debt Service Levy

This figure represents the levy used to service the debt from bond issues and other notes that primarily provide for capital improvements in a district.

Valuation Per Student in ADA

The valuation per student in ADA is calculated by subtracting the special homestead valuation (over 65 years of age or disabled) from the total assessed valuation and dividing the total by the Average Daily Attendance.

Title I

Title I is a compensatory education program that provides supplementary instruction to students who are achieving below average in comparison to their peers. The intent of the program is to assist students in meeting state achievement standards expected of all children.

Title I Allocation

The total Title I allocation is based on approved 2001-2002 allocations. No carry-over funds are included.

% of Enrollment Served

The percentage of enrollment served is calculated by using an unduplicated count of served students divided by district enrollment. These counts are provided in the initial 2001-2002 project application.

Number of Title I Schools

Individual school sites that actually conduct Title I programs are included in this count.

Other

Number of AP Courses Offered

The number of advanced placement courses (AP) offered is the actual number of AP courses taught in the district.

Graduation Rate

The graduation rate is calculated by dividing the number of graduates by the number of ninth grade students four years earlier. The ninth grade enrollment number has been adjusted to reflect the number of new students entering the system, the number moving out, the number failing, and the number of deaths. Students who were originally coded by the school districts as dropouts who are later determined to be transfer students may not be included in the calculations. Please note the dropout rate is not the inverse of the graduation rate.

ACT % College Prep

Students are classified as college prep according to the ACT definition of college prep coursework. ACT college prep coursework is defined as four or more years of English, three or more years of mathematics, three or more years of social studies, and three or more years of science. To determine the percentage in ACT college prep, the total number of college prep students is divided by the total number of students enrolled in the 12th grade (end of last month) for each district.

Mississippi Curriculum Content Assessment System

The primary purposes of the *Mississippi Curriculum Content Assessment System* are to provide information needed for state-level decisions about the effectiveness of instructional programs in local school districts and to provide districts with information to be used in improving instruction. The primary goals of the *Mississippi Curriculum Content Assessment System* are to promote instructional improvement in classrooms throughout the state and to provide valid, reliable data for accountability purposes in compliance with MS Code 37-16-1 and SB 2156. Since 1998 Mississippi has been extensively revising the assessment system used for K-12 students. The revised *Mississippi Curriculum Content Assessment System* better fits the needs of students, parents, and schools and will serve as the basis of the state's new accountability system.

The objectives of this program include: assistance in the identification of educational needs at the state, district, and school levels; assessing how well districts and schools are meeting state goals and academic growth standards; providing information to aid in the development of policy issues and concerns; providing a basis for comparisons among schools, districts and between districts, the state, and the nation, where appropriate; and producing data which can be used to aid in the identification of exceptional educational programs or processes.

Mississippi Curriculum Test

The Mississippi Curriculum Test (MCT) is aligned with the Mississippi Curriculum Frameworks. Mississippi teachers reviewed all test items and established the proficiency level standards. The test measures student performance in reading, language, and mathematics at grades 2 through 8. There are four proficiency levels on the MCT: Minimal, Basic, Proficient, and Advanced. The MCT data are reported in terms of the percentage of students scoring in various proficiency levels on the test (Basic and Above; Proficient and Above). Results are reported separately for students taking the MCT at grade level and certain students with disabilities who took the MCT at "instructional level."

Grade 4 and 7 Writing Assessments

These assessments are aligned with the Mississippi Curriculum Frameworks. Mississippi teachers developed the writing prompts and designed the scoring rubrics. Each student responds to two writing prompts: narrative, informative, or persuasive. Each student response is scored on a scale of 0-4. The Writing Assessment data are reported in terms of the percentage of students obtaining certain writing scores (2 and Above; 3 and Above).

Subject Area Testing Program (SATP)

This testing program consists of end-of-course, criterion-referenced tests in Algebra I, Biology I, U.S. History from 1877, and English II with a writing component. The SATP provides a meaningful assessment of secondary academic content tied to the Mississippi Curriculum Frameworks and promotes instructional strategies integrating both content and problem solving. It also offers a meaningful tool for accountability of local schools and districts. The SATP is currently being phased in to ultimately replace the FLE as a requirement for graduation. Mississippi teachers from each content area participated in the standard setting process. A scale score of 300 was established as the minimum passing score. The SATP data are reported as mean scale scores, except for the English II writing component results which are reported as mean raw writing scores (on a scale of 0-4).

Functional Literacy Examination (FLE)

The FLE is the minimum competency test currently required to receive a Mississippi high school diploma. It is initially administered in the 11th grade with repeat testing in the 11th and 12th grades for those not passing. The test includes multiple-choice questions in reading, mathematics and written communications along with a direct writing prompt. The FLE was initially developed and implemented in the mid 1980s. As the new SATP comes online and students are required to pass each of those tests to receive a high school diploma, the FLE will be phased out. The FLE data are reported as mean scale scores for first-time takers. The percentage of students passing the entire FLE on the first attempt is also reported.

Norm-Referenced Assessment

The norm-referenced assessment (NRT) consists of survey battery tests in mathematics, reading, and language arts. The NRT is the CTBS/5--part of the *TerraNova* assessment series. Student performance on the NRT can be compared to a 1996 national norm group. The NRT is timed and administered under standard conditions. During the 2001-2002 school year, students in grades 5 and 8 were tested. There are no plans for this test to be included in the new accountability system. The NRT data are reported as mean normal curve equivalent (NCE) scores.

ACT

The ACT is not a part of the Mississippi Curriculum Content Assessment System; however, most graduating seniors in Mississippi have taken the ACT at least once. The mean ACT composite scores for the 2001-2002 graduating seniors are reported separately for all students and for students who indicated that they were enrolled in a "core" (college prep) curriculum.

Important Information about the Student Assessment Data

The federal requirements for reporting state assessment results (particularly ESEA/Title I requirements) mandate that the data be reported for each school and school district disaggregated in the following ways: for all students, for students with disabilities as compared to non-disabled students, by gender, by race/ethnicity, by migrant status, by limited English proficiency status, and for economically-disadvantaged students as compared to students who are not economically disadvantaged. The volume of data resulting from those analyses is too great to allow the results for all schools and districts in Mississippi to be presented in a printed document; therefore, the student assessment data have been compiled and presented as follows in the Mississippi Report Card for 2001-2002.

For each of the 149 public school districts and the three agricultural high schools, there is one page of assessment data in the abridged Mississippi Report Card (the printed document). The data appearing on that page includes the district level MCT, Writing Assessment, SATP, FLE, and ACT results as well as the NRT results for grades 5 and 8. These results are reported for all the required student subgroups, to the extent possible.

All the student assessment data for each school, each school district, and for the state (disaggregated as required, to the extent possible) are published in HTML (web page) format on the Mississippi Report Card CD and on the Mississippi Report Card web site. The web site is accessible at www.mde.k12.ms.us/account/RC2B/RC2B.htm.

Codes Used for Identifying Tests, Subgroups, and Certain Data Values

The following codes are used in the Mississippi Report Card to identify information about the tests that are part of the assessment system.

- MCT=Mississippi Curriculum Test (for grades 2-8)
- WRIT=Writing Assessment (for grades 4 and 7)
- SATP=Subject Area Testing Program (for certain courses)
- FLE=Functional Literacy Examination (first administration occurs in grade 11)
- NRT=Norm-Referenced Assessment--the TerraNova Survey (for grades 5 and 8)
- ACT=ACT Results for 2001/2002 graduating seniors

The Subject Area, Course, or Section of the Test

- READ=Reading
- LANG=Language
- MATH=Mathematics
- ALG1=Algebra I
- BIOL=Biology I
- ENGL=English II
- HIST=U.S. History from 1877
- WRIT=Written Communication
- COMP=Composite (across subjects/sections)
- PASS=Percentage of students passing the test

The Grade (or other information)

- GR2=Grade 2 (same format used for grades 3-8)
- RLC=Reading & Language Conventions component of the English II test
- NAR=Narrative essay on the English II test
- INF=Informative essay on the English II test
- COR=Data for "Core" (or college prep) students on the ACT
- ALL=Data for all students taking the ACT
- L12=Instructional Level Testing at Level 12 (L13=Level 13, etc.)

The **test data values** represent different kinds of measures for different tests. The following data formats are used in the Mississippi Report Card.

- MCT: BB/PP where BB=% Basic & Above, PP=% Proficient & Above
- WRIT: BB/PP where BB=% Scoring 2 & Above, PP=% Scoring 3 & Above
Note: For MCT & WRIT, ** means 100%
- SATP (most): XXX.X = Mean Scale Score
- ENGL NAR & INF: X.X = Mean Writing Assessment Raw Score
- NRT: XX.X = Mean NCE Score
- ACT: XX.X = Mean Scale Score

- For all tests:
 - "-" means that the student N-Count was 0.
 - "<" means that the student N-Count was between 1 and 9.
 - The column is left blank for data that could not be disaggregated.

Special notes concerning the MCT:

There are four proficiency levels on the MCT. They are (from lowest to highest) Minimal, Basic, Proficient, and Advanced. The reporting format used in the Mississippi Report Card allows the maximum amount of information to be reported in the smallest possible space and is consistent with the way most states are now reporting assessment results. This format is compliant with federal Title 1 regulations and is similar to the format used for reporting NAEP results.

The percentage of students "Basic & Above" includes all students scoring in the Basic, Proficient, and Advanced proficiency levels. The percentage of students "Proficient and Above" includes all students scoring in the Proficient and Advanced proficiency levels. The percentage of students in the lowest proficiency level (Minimal) can be determined by subtracting the percentage "Basic and Above" from 100%. The percentage of students in the highest proficiency level (Advanced) cannot be determined from the reported data.

Disaggregation of Subgroups

To the extent possible, the 2001-2002 test results reported in the Mississippi Report Card are disaggregated by subgroup as required by federal law. The codes used to label the subgroups are listed below followed by additional information about test data disaggregation.

- ALL=All students in the state, the district, or the school
- NDO=Non-Disabled Students Only
- DO=Only Students with Disabilities
- MAL=Male
- FEM=Female
- BLK=Black
- WHT=White
- ASI=Asian
- HIS=Hispanic

- NAM=Native American
- OTH=Other Ethnicity (this category does not apply to all tests)
- ELL=English Language Learner (denotes limited English proficiency)
- ED=Economically Disadvantaged
- NED=Not Economically Disadvantaged
- MIG=Migrant

The determination of a student's classification in the following subgroups was made on the basis of the information gridded on the student's test answer document(s) or from the student's "end of month 7" demographic information in MSIS. The groupings formed using the MSIS demographic codes represent students whose MSIS IDF on the test data records could be accurately matched to the MSIS database. The approximate statewide match rates for the various testing programs ranged from 75% to over 90%, but the match rate for individual districts and schools may have been higher or lower.

The accuracy of the test results could have been affected by the match rate for a school, a district, or the state.

The coding used for identifying students in the economically disadvantaged and non-economically disadvantaged groups is the individual student free lunch eligibility flag. For schools and districts where it was not possible to obtain accurate free lunch participation data for individual students, the columns for those subgroups are blank.

Test: MCT=Mississippi Curriculum Test (for grades 2-8); WRIT=Writing Assessment (for grades 4 and 7); SATP=Subject Area Testing Program (for certain courses); FLE=Functional Literacy Examination (first administration occurs in grade 11); NRT=Norm-Referenced Assessment (TerraNova Survey, for grades 5 and 8); and ACT=ACT Assessment (results for graduating seniors). Subject: Identifies the subject area, course, or section of the test. Grade: Grade level of test, component of test, or other information. Test Data Values: Values shown on this page are either mean scores (XXX.X) or percentages of students scoring in proficiency levels (XX/XX=% Basic and above/% Proficient and above). For all tests, "-" means that the student N-Count was 0; "<" means that the student N-Count was between 1 and 9; "***" means 100% of students; the column is left blank for data that could not be disaggregated. The information on this page is explained further in the introduction of this book. Additional test data for this district can be found on the Mississippi Report Card CD or on the web at <http://www.mde.k12.ms.us/account/RC2B/RC2B.htm>.

Agricultural High Schools

During the first forty years of this century, fifty-four agricultural high schools were established in rural areas of Mississippi for the dual purpose of teaching students theoretical and practical agriculture and providing services to farmers in the counties where they were established. In fact, the agricultural high schools paved the way for Mississippi's junior college system to evolve into the present community college system.

Three of those high schools retain the title of agricultural high school. These schools, not unlike other high schools in the state, provide a general or college preparatory education for high school students (grades 9-12). These three high schools are recognized as school districts, and each will be assigned an accreditation status as are the 148 districts with schools encompassing grades K-12, one district encompassing grades K-9, and one district encompassing grades K-6.

Mississippi Report Card for 2001-2002

Labels and Codes Used in the Report Card

This document explains the terminology, labels, codes, and data values that appear in the Mississippi Report Card for 2001-2002. The content and format of the report card complies with the requirements set forth in the No Child Left Behind Act of 2001 (NCLB).

School Improvement is a term used in reference to schools that were identified as having failed to make adequate yearly progress on student achievement for two years (2000-2001 and 2001-2002). The concepts of adequate yearly progress and school improvement are described in detail in the NCLB legislation.

NCLB requires the reports cards to contain information on the qualifications of teachers in each school, each district, and the state. The calculations are based on classroom teachers who teach any of the "core academic subjects" identified in NCLB -- English, reading or language arts, mathematics, science, foreign languages, civics and government, economics, arts, history, and geography. An NCLB core academic subject teacher was considered to be highly qualified if he/she held full current (unexpired) state certification during the 2001-2002 school year. NCLB core subject teachers who held only emergency certification were not considered to be highly qualified. All calculations were based on the official public school personnel snapshot (MSIS database extract from 2001-2002). A teacher was identified as an NCLB core subject teacher if any of the course codes on the teacher's schedule fell in a core academic subject area.

The following codes are used to identify information about the tests that are part of the assessment system.

(1) The Test

MCT=Mississippi Curriculum Test (for grades 2-8)
WRIT=Writing Assessment (for grades 4 and 7)
SATP=Subject Area Testing Program (for certain courses--see below)
FLE=Functional Literacy Examination (first administration occurs in grade 11)
NRT=Norm-Referenced Assessment--the TerraNova Survey (for grades 5 and 8)
ALT=Alternate Assessment (for certain students with disabilities)

(2) The Subject Area, Course, or Section of the Test

READ=Reading
LANG=Language
MATH=Mathematics
ALG1=Algebra I
BIOL=Biology I
ENGL=English II
HIST=U.S. History from 1877
WRIT=Written Communication
COMP=Composite (across subjects/sections)
PASS=Percentage of students passing the test

(3) The Grade (or other information)

GR2=Grade 2 (same format used for grades 3-8)
RLC=Reading & Language Conventions component of the English II test
NAR=Narrative essay on the English II test
INF=Informative essay on the English II test
ALL=Data for all students taking Alternate Assessments
L12=Instructional Level Testing at Level 12 (L13=Level 13,etc.)

The test data values represent different kinds of measures for different tests. The following data formats are used in the Mississippi Report Card.

MCT: BB/PP where BB=% Basic & Above, PP=% Proficient & Above
WRIT: BB/PP where BB=% Scoring 2 & Above, PP=% Scoring 3 & Above
ALT: BB/PP where BB=% Approaching Proficiency & Above, PP=% Proficient
Note: For MCT, WRIT, & ALT, ** means 100%
SATP (most): XXX.X = Mean Scale Score (300 is a passing score)
ENGL NAR & INF: X.X = Mean Writing Assessment Raw Score (on a scale of 0-4)

NRT: XX.X = Mean NCE Score

For all tests:

"-" means that the student N-Count was 0.

"<" means that the student N-Count was between 1 and 9.

The column is left blank for data that could not be disaggregated.

Special note concerning the MCT: There are four proficiency levels on the MCT. They are (from lowest to highest) Minimal, Basic, Proficient, and Advanced. The reporting format used in the Mississippi Report Card allows the maximum amount of information to be reported in the smallest possible space and is consistent with the way most states are now reporting assessment results. This format is compliant with federal Title 1 regulations and is similar to the format used for reporting NAEP results.

The percentage of students "Basic & Above" includes all students scoring in the Basic, Proficient, and Advanced proficiency levels. The percentage of students "Proficient and Above" includes all students scoring in the Proficient and Advanced proficiency levels. The percentage of students in the lowest proficiency level (Minimal) can be determined by subtracting the percentage "Basic and Above" from 100%. The percentage of students in the highest proficiency level (Advanced) cannot be determined from the reported data.

Disaggregation of Subgroups

To the extent possible, the 2001-2002 test results reported in the Mississippi Report Card are disaggregated by subgroup as required by federal law. The codes used to label the subgroups are listed below followed by additional information about test data disaggregation.

ALL=All students in the state, the district, or the school

NDO=Non-Disabled Students Only

DO=Only Students with Disabilities

MAL=Male

FEM=Female

BLK=Black

WHT=White

ASI=Asian

HIS=Hispanic

NAM=Native American

OTH=Other Ethnicity (this category does not apply to all tests)

ELL=English Language Learner (denotes limited English proficiency)

ED=Economically Disadvantaged

NED=Not Economically Disadvantaged

MIG=Migrant

The determination of a student's classification in the above subgroups was made on the basis of information gridded on the student's test answer document(s) or from the student's "end of month 7" demographic information in MSIS. The groupings formed using the MSIS demographic codes represent students whose MSIS ID on the test data records could be accurately matched to the MSIS database. The approximate statewide match rates for the various testing programs ranged from 75% to over 90%, but the match rate for individual districts and schools may have been higher or lower.

The accuracy of the test results could have been affected by the match rate for a school, a district, or the state.

The coding used for identifying students in the economically disadvantaged and non-economically disadvantaged groups is the individual student free lunch eligibility flag. These data were not available when the report cards were produced in September 2002. Student assessment data reported separately (disaggregated) for economically disadvantaged students and non-economically disadvantaged students was added to the report cards on this site on December 17, 2002. For schools and districts where it was not possible to obtain accurate free lunch participation data for individual students, the columns for those subgroups are blank.

Student Participation in Statewide Assessment

The student's MSIS grade and age were used to determine whether the student should have been assessed during 2001-2002. Any student actually enrolled in grades 2-8 were considered "eligible" for testing. For students with disabilities who were not actually enrolled in a grade, the student was considered eligible for testing if the student's age fell in the age range for students who are enrolled in grades 2-8. All students who took an MCT at grade level, an MCT at instructional level, or an alternate assessment were counted as tested.
