

Mississippi Statewide Assessment System

The primary purposes of the Mississippi Statewide Assessment System are to provide information needed for state-level decisions about the effectiveness of instructional programs in local school districts and to provide districts with information to be used in improving instruction. The Mississippi Statewide Assessment System promotes instructional improvement in classrooms throughout the state and provides valid, reliable data for accountability purposes in compliance with MS Code 37-16-1, SB 2156, SB 2488, and the *No Child Left Behind Act of 2001*.

The objectives of this program include the following: assistance in the identification of educational needs at the state, district, and school levels; assessing how well districts and schools are meeting state goals and academic growth standards; providing information to aid in the development of policy issues and concerns; providing a basis for comparison of school, district, and state performance; and producing data which can be used to aid in the identification of exceptional educational programs or processes.

Mississippi Curriculum Test The Mississippi Curriculum Test (MCT) measures student performance in reading, language, and mathematics in grades 2 through 8. The MCT is based on the Mississippi Curriculum Frameworks which define what students are expected to know and be able to do and are the basis for teacher instruction. Mississippi teachers reviewed all test items and established the proficiency level standards. The MCT is used for holding schools accountable for academic achievement, the academic growth (improvement) of students, and for the computation of Adequate Yearly Progress (AYP). CTB/McGraw-Hill is the contractor for the MCT.

Norm-Referenced Test This norm-referenced test (NRT) consists of tests in mathematics, reading, and language arts. The NRT is the CTBS/5, which is part of the *TerraNova* assessment series published by CTB/McGraw-Hill. Student performance on the NRT can be compared to a 1996 national norm group. Currently, the norm-referenced test is administered to students in grade 6.

Grades 4 and 7 Writing Assessments The writing assessments measure student performance in on-demand writing. Each student responds to one writing prompt in the narrative, informative, or persuasive mode. These assessments are aligned with the Mississippi Curriculum Frameworks. Mississippi teachers reviewed the writing prompts and designed the scoring rubrics (rules). CTB/McGraw-Hill is the contractor for the Grades 4 and 7 Writing Assessments.

Subject Area Testing Program The Subject Area Testing Program (SATP) consists of end-of-course, criterion-referenced tests in Algebra I, Biology I, English II, and U.S. History from 1877. The tests for Algebra I, Biology I, and U.S. History contain multiple-choice items and an open-ended item. The test for English II consists of two components: a multiple-choice test and a writing assessment. The SATP provides a meaningful assessment of secondary academic content tied to the state's content standards and promotes instructional strategies integrating both content and problem solving. All Subject Area Tests count for graduation; however, the tests required for graduation are determined

by the year the student entered the ninth grade. The Subject Area Tests are used for holding schools accountable for academic achievement, the academic growth (improvement) of students, and for the computation of Adequate Yearly Progress (AYP). Harcourt Assessment, Inc., is the contractor for the SATP.

Mississippi Career Planning and Assessment System The Mississippi Career Planning and Assessment System (MS-CPAS) is the state vocational testing program. The purpose of the MS-CPAS is to assess local program performance in producing students with workplace readiness skills and to create a meaningful accountability measure of the level of instruction and resulting student performance in occupation program areas. ACT, Inc., is the contractor for the workplace readiness skills assessments, and Southern Illinois University is the contractor for the occupation-specific assessments.

Functional Literacy Examination The Functional Literacy Examination (FLE) is the minimum competency test currently required to receive a Mississippi high school diploma. It is initially given in the 11th grade with repeat testing in the 11th and 12th grades for those not passing. The test includes multiple-choice questions in reading, mathematics, and written communications, along with a direct writing prompt. The FLE was initially developed and implemented in the mid-1980s. With the implementation of the Subject Area Testing Program, students will be required to pass the Subject Area Tests to receive a high school diploma, and the FLE will be phased out. Students entering ninth grade in 2001-02 (class of 2005), are the last students required to pass any portion of the FLE. For most students, mathematics is now the only section of the FLE required for graduation. NCS Pearson, Inc., is the contractor for the FLE.

¹The CTBS/5 is the multiple-choice norm-referenced test that is part of the Terra Nova Assessment Series published by CTB/McGraw-Hill.

²In each cell of the table, the mean Normal Curve Equivalent (NCE) value is printed first followed by the National Percentile Rank (NPR) corresponding to the mean NCE value. The third value in each cell is the number of students on which the NCE and NPR values were calculated.

³The total is the composite score combining the Reading, Mathematics, and Language subtests on the CTBS/5.

⁴%<Q1 is the percentage of students with scores in the lower quarter of the national distribution (i.e., at or below the 25th percentile). Data reported for the lower quarter of the CTBS/5 distribution include students with a percentile rank of exactly 25.

Average Cost Per Student in School Year 2004-2005: \$1.58
